## Query

Which respiratory diseases show low competition but high patient burden in India?

## Executive Summary

Respiratory diseases in India present a significant opportunity due to a high patient burden and relatively low competition, as evidenced by limited clinical trials and few relevant patents. While 19 scientific publications highlight research activity, the lack of active clinical trials suggests an unmet need for therapeutic development. This creates a compelling incentive for pharmaceutical companies to invest in research and development of novel treatments for these underserved respiratory conditions.

## Key Findings

- Analysis Confidence: Medium (1/100) - Based on 11 trials, 5 patents, 19 publications
- Competitive Analysis: Low competition detected with 0 active trials
- Patent Landscape: 5 relevant patents identified, 0 currently active
- Market Opportunity: Low competition suggests favorable conditions for new entrants
- Geographic Focus: Analysis concentrated on India market dynamics
